

## Second EDLproject Workshop on developing the European digital library

Austrian National Library, Vienna  
31 January – 1 February, 2007

Agenda and Briefing Paper  
Final Version, 2007-01-29

### About The European Library

*The European Library* ([www.TheEuropeanLibrary.org](http://www.TheEuropeanLibrary.org)) is a portal for accessing the digital collections of 23 of the National Libraries of Europe. *The European Library* is owned by the Conference of European National Librarians (CENL) ([www.cenl.org](http://www.cenl.org)) and aims to access digital collections from all 47 member libraries within the next 5 years.

### About EDLproject

*EDLproject* ([www.edlproject.eu/](http://www.edlproject.eu/)) is a Targeted Project funded by the European Commission under the eContent<sup>plus</sup> Programme and coordinated by the German National Library. The project, started in September 2006, will work towards the enlargement of the bibliographic catalogues and digital collections available in *The European Library*. *EDLproject* also addresses the enhancement of multilingual capabilities of *The European Library* portal and maps **the first steps towards collaboration between *The European Library* and other cultural heritage networks, projects and initiatives.**

### Purpose and format of this workshop

Aim of the workshop is to understand where the challenges will lie in governance, organisation, communication and goals for a European digital library and to create use case scenarios to see where the stumbling blocks might be. Any European digital library will need to be representative of its stakeholders but able to perform speedily for its users. It will need to be financially sustainable in the longer term and able to move at the pace of the fastest without causing undue strain on the slower participants.

**! In order to maximise the outcomes of the meeting and to ensure a well-structured discussion process, delegates are asked to provide 1) an overview of their organisation or project, its legal basis and its business model and 2) two vision statements\*: one statement for their organisation and one for a possible European digital library. These statements should contain the following elements:**

- A graphic description of where the organisation would like to be in 5 or 10 years time.
- Who the vision is addressing
- And for preference should be SMART – Specific, Measurable, Achievable, Realistic and Timebound

Please prepare at 1–2 page document (A4) in MS Word containing the overview and the vision statements.

**Please send this text to [elisabeth.weigl@onb.ac.at](mailto:elisabeth.weigl@onb.ac.at) before January 15.** We will compile these documents and will use them as input for the break-out sessions.

\* A **vision statement** is a vivid idealized description of a desired outcome that inspires, energizes and helps you create a mental picture of your target
